Forecast—Tuesday, partly cloudy.

Jack Frost has just about com-
pleted his work for this season and
is waiting for a warm day to
depart. The weather is now
just what is needed for the
beginning of spring, which means
Monday morning. In the
city, before the sun had
over the rugged Wasatch moun-
tains, the song of the lark was heard
in many months. This
is the first time in many months
that the frost is out of the
city and the weather is warm.

the nerves becoming the connecting
wire.
